Faculty of Social Work

Study of Social Sciences and
Psychology

(2019-2024)

ABOUT ME

I am a front-end website programmer who specializes in converting designs into interactive web pages. I strive to achieve an excellent user experience and provide a smooth and comfortable browsing experience for users. I have experience with major programming languages and popular frameworks, and pay great attention to interoperability and performance optimization. You work effectively within development teams and communicate well with customers and colleagues.
